Recycle bin tree	
Code	TB3D0394
Size	110 x 180 x 110 cm

We need to make wasting our resources unacceptable in all aspects of our life. Every product we buy has an environmental footprint and could end up in landfill. The impact of plastic pollution on our oceans is becoming increasingly clear, having drastic impacts on marine life.

**Recycling** what we can reduces the amount of new materials we are making, and upcycling is a creative way to make old items into something more valuable. This could be reusing a jam jar as a candle holder, or using old tins as plant pots – the possibilities are endless!
